

KANTAR PUBLIC

One in three Britons say their household is likely to need financial support in next three months

22 April 2020, London – Our monthly public opinion and voting intentions research in Britain reveals some of the highest figures since our tracking started nearly a decade ago – including loss of confidence in job security and pessimism over the health of Britain’s economy now and in the future.

Findings from the research, which took place between 16 and 20 April, reveal a significant deterioration of opinions over the last four weeks:

- One in three (33%) agree that their household is likely to require financial support from government within the next three months
- Job insecurity is rising fast. Almost half of those working (44%) believe their job is less safe than it was 12 months ago. This is the highest recorded figure since our measurement began in August 2011 (and compares to 26% in March)
- One in three (32%) said they are finding it harder to meet their monthly household budget than they were 12 months ago, a 5pt increase month on month
- Expectations of government intervention in the economy are high, with very high levels of agreement (84% agree or strongly agree) that “it’s important the government helps people and business affected by coronavirus, whatever the cost”
- Public confidence in the economy drops to lowest level since measurement began in August 2011, with two thirds of people (65%) stating that Britain’s economy is doing worse than 12 months ago, compared to 31% in March 2020. The previous high was 58% in December 2011
- In an indication that the public expect Coronavirus to have a long-term impact, half of people (50%) think that the economy will be worse in 12 months, compared to 32% of people last month. This is also the highest figure since tracking started in August 11), previous high was 43% in September 2011.

Perception of the government and voting intentions

In terms of understanding the available government support, just over half (52%) are sure/think that there is “financial support available from the government for people like you to manage the effects of the coronavirus crisis”.

Six in ten people (61%, +14 compared to March research) think that the government are handling the coronavirus very/fairly well, with three in ten thinking they are handling it very/fairly poorly (30%, -3). 10% don’t know (-10).

KANTAR PUBLIC

Voting intentions:

- Conservative 54% (+4 vs March 2020)
- Labour 28% (-1)
- Liberal Democrats 9% (-2)
- SNP 4% (no change)
- Green 4% (+2)
- The Brexit Party 1% (nc)
- Plaid Cymru 1% (nc)
- UKIP <1% (-1)
- Other <1% (nc)

These findings, along with the findings from our recent G7 citizen impact of coronavirus study, show that there is a growing majority who believe the government is handling the crisis well and a strong public belief that supporting people and business during this time should be a priority, no matter the cost.

However, increasing numbers reporting concerns over their ability to meet household budget, and one in three stating their household would require financial support in the coming months. Understanding the levels of support needed is crucial for government policy to be able to respond effectively.

This study, reflecting our research in the G7 nations, shows that personal economic impacts are deepening. Kantar's Social Response and Recovery programmes are supporting policymakers around the world to respond to these challenges and develop policy to build for a resilient recovery.

*A representative sample of 1,171 adults in Great Britain were interviewed between the 5th and 9th March 2020. All interviews were conducted as online self-completion with Kantar online access panel as the main sample source. Full report can be found [here](#).

Notes to Editors

Additional findings and methodology:

- 41% (-3) of Britons would prefer a UK-EU trade deal to come into force after the transition period, compared to 20% (-2) who prefer that the UK exits under WTO terms with no EU trade deal. 39% (+5) 'don't know'.
- 17% (+1) of Britons think that leaving the European Union will make it easier for the UK government to handle outbreaks like Coronavirus in the future. 27% (+10) think it will be more difficult. Majority of Britons don't think that the UK leaving the EU will make it easier or more difficult for the UK government to handle outbreaks like Coronavirus in the future (41%).

Public view on negotiations with the European Union

- Three in ten Britons (33%, +1) think that the UK government is handling the negotiations regarding the UK and EU's future 'well'; 34% (-8) of people think they are being handled 'poorly'.

KANTAR PUBLIC

- There is no clarity amongst the public about how the UK will exit the transition period with. 26% (-2) think it is most likely the UK will leave with a trade deal with EU; 26% (-3) think the UK will exit transition period under WTO terms with no EU trade deal; 48% (+6) 'don't know'.
- If a new referendum was held on the UK's membership of the European Union, 37% (nc) of Britons say they would vote to Remain, 36% (+2) say they would vote to Leave. 18% (-3) say they wouldn't vote and 9% (+1) 'don't know'.

-Ends-

Methodological information

The survey data and further details on the methodological approach can be found here.

A total of 1,118 interviews were conducted online among adults living in Great Britain between 16th and 20th April 2020. Interviews were conducted using the Kantar Research Express Online Omnibus, which uses the Kantar online access panel as its sample source.

The data was weighted to match population totals for age, gender, working status, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election.

Any use of this research must cite Kantar as the source.

Polling Methodological Note – April 2020

A representative sample of 1,118 adults in Great Britain were interviewed between the 16th and 20th April 2020. All interviews were conducted as online self-completion. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, working status, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page two.

Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age and whether reported voting in the 2017 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2017 General Election.

Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017¹). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 50.9% to 55.8%
- Labour Party = 25.5% to 30.1%
- Conservative lead over Labour = 21.6%pts to 30.5%pts

¹ See: https://www.europeansurveyresearch.org/news/non-prob/INPS_06_Kuha.pdf and <https://rss.onlinelibrary.wiley.com/doi/full/10.1111/rssa.12329>

Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

Gender* and working status

Source: Annual Population Survey (Jul 2018-Jun 2019)

	Unweighted count	Weighted count
Male working	366	367
Male not working	175	179
Female working	324	328
Female not working	253	244

*Those reporting an "other" gender are randomly allocated to male or female.

Gender* and age

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
Male 18-24	54	63
Male 25-34	92	96
Male 35-44	92	89
Male 45-54	103	96
Male 55-69	128	119
Male 70+	72	84
Female 18-24	56	59
Female 25-34	93	95
Female 35-44	97	90
Female 45-54	108	99
Female 55-69	160	124
Female 70+	63	104

*Those reporting an "other" gender are randomly allocated to male or female.

Region

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
North East England	60	47
North West England	110	126
Yorkshire & Humber	120	95
East Midlands	102	84
West Midlands	88	101
East of England	110	107
London	129	151
South East England	116	157
South West England	107	99
Wales	75	55
Scotland	101	97

Education by age

Source: Annual Population Survey (Jul 2018-Jun 2019)

	Unweighted count	Weighted count
Aged 18-24 with a degree	31	22
Aged 25-44 with a degree	182	156
Aged 45-69 with a degree	152	118
Other	753	821

Vote in the 2016 EU referendum*

Source: EU referendum & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
Remain	43%	31%
Leave	41%	33%
Did not vote	16%	36%

*An imputed response is given for those that prefer not to say who they voted for in the referendum.

Vote in the 2019 General Election*

Source: General Election & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
England - Labour	21%	18%
England - Conservative	34%	25%
England - Lib Dem	8%	7%
England - Other	6%	3%
England - No vote	16%	34%
Scotland - Labour	1%	1%
Scotland - Conservative	1%	1%
Scotland - SNP	4%	2%
Scotland - Other	1%	1%
Scotland - No vote	2%	3%
Wales - Labour	2%	1%
Wales - Conservative	2%	1%
Wales - PC	1%	<0.5%
Wales - Other	1%	<0.5%
Wales - No vote	1%	2%

*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated Voting Age Population turnout if General Election were to be held tomorrow	82%	60%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2017 general election and immediately after the election.

Further details

Corona5. The NHS is planning to launch a contact-tracing app for mobile phones. Once downloaded, this app would use the phone's location data so that it can warn users if they have recently been in close proximity to someone suspected to be infected with the coronavirus. How likely or unlikely would you be to use this app?
