

# Polling Methodological Note – 3<sup>rd</sup> July 2024

A representative sample of 2,135 adults in Great Britain was interviewed between the afternoon of 28<sup>th</sup> June and the morning of 1<sup>st</sup> July 2024. Our sample was drawn from Verian's random sample panel Public Voice.

This panel is used extensively for social research commissioned by government, academic and third sector organisations, including those based in the US and Europe. Membership of this panel is restricted to those living in a controlled sample of UK addresses drawn from the Royal Mail's master database. This restrictive method of panel-building is relatively expensive but will ordinarily provide benefits in terms of sample and data quality when compared with a panel that any adult resident in the UK can join. Although the short-period fieldwork web-only protocol used for this poll is much more limited than is typical for a social research survey, the demographic and political composition of the sample is only modestly degraded compared to what could be obtained using the full social research data collection protocol (two to three weeks using both web and telephone interview modes).

The data was weighted in multiple stages. First, design weighting was applied to account for variations in sampling probability (both for selection into the Public Voice panel and for selection into this specific poll). Second, non-response modelling was used to account for variations in response probability that are associated with the extensive profiling data held about all Public Voice panel members. Finally, the data was calibrated to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further information about the benchmarks used in the final weighting stage can be found on page 3.

The response rate for this poll was 22% (2,135 completes out of 9,753 Public Voice panellists invited to take part in the survey).

## **Voting intentions**

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

It should be noted that "Reform UK" and "Green Party" were included on a second screen. The first screen included the following other code – "Other party or individual (such as Reform UK or the Green Party)".

A squeeze question has been used to get an indication of which way non-disclosers are leaning.

Voting intention has been imputed for those that have not stated a preference (at either the main voting intention question or at the squeeze). The imputation model is based on age, gender, country, self-assessment on a 7-point left-right political spectrum, pro / anti-EU sentiment, media consumption, views on immigration, personality traits, and the most important policy area for the election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age, and whether or not individuals reported voting in the 2019 general election. The parameters for this were based on a subset of the Public Voice panel recruited just before the 2019GE and surveyed about that election shortly afterwards.

Those that say they are not registered to vote, or don't know if they are registered to vote are excluded from our headline voting intentions.

## **Uncertainty**

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

## **Sampling variance**

We have calculated robust standard errors taking into account the poll sample design and the weighting applied. The 95% Confidence Intervals for key voting intention estimates are provided below.

- Conservative Party = 19.5% to 23.3%
- Labour Party = 33.7% to 38.4%
- Liberal Democrats = 11.0% to 14.2%
- Reform UK = 14.3% to 18.0%
- Green = 6.2% to 9.0%
- SNP = 2.4% to 3.6%

## Weighting benchmarks

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided above each table.

### Gender\* and age

Source: ONS Mid-Year-2022 Population Estimates:

	Unweighted count	Weighted count
Male 18-24	51	114
Male 25-34	137	176
Male 35-44	180	171
Male 45-54	192	170
Male 55-69	265	236
Male 70+	190	167
Female 18-24	71	110
Female 25-34	152	184
Female 35-44	221	181
Female 45-54	213	176
Female 55-69	261	246
Female 70+	202	205

\*Those reporting an "other" gender have been randomly allocated to either male or female solely for the purpose of weighting.

### Region

Source: ONS Mid-Year-2022 Population Estimates:

	Unweighted count	Weighted count
North East England	59	88
North West England	212	243
Yorkshire & Humber	149	179
East Midlands	125	161
West Midlands	155	193
East of England	215	207
London	280	285
South East England	276	304
South West England	180	191
Wales	88	103
Scotland	396	182

### Education by age

Source: ONS Annual Population Survey (July 2022-June 2023)

	Unweighted count	Weighted count
Aged 18-24 with a degree	61	50
Aged 25-44 with a degree	444	349
Aged 45-69 with a degree	379	264
Other	1251	1472

### Vote in the 2016 EU referendum\*

Source: EU referendum & ONS Mid-Year-2022 Population Estimates

	Unweighted percentage	Weighted percentage
Remain	41%	30%
Leave	32%	33%
Did not vote	26%	37%

\*For weighting, we have primarily used past vote captured in the Public Voice recruitment surveys. Where this information is missing, the information provided in this poll has been used. An imputed response is given for those who did not say who they voted for in the referendum (at the recruitment survey or in this poll). Those who were too young to vote in the referendum have been allocated to "No vote" for the purpose of weighting.

### Vote in the 2019 General Election\*

Source: 2019 General Election & ONS Mid-Year-2022 Population Estimates

	Unweighted percentage	Weighted percentage
No vote	26%	40%
Labour	23%	20%
Conservative	30%	27%
Liberal Democrats	8%	7%
SNP	8%	2%
Other	5%	4%

\*For weighting, we have primarily used past vote captured in the Public Voice recruitment surveys. Where this information is missing, the information provided in this poll has been used. An imputed response is given for those who preferred not to say who they voted for in the 2019 General Election (at the recruitment survey or in this poll). Those who were too young to vote in the 2019 General Election have been allocated to "No vote" for the purpose of weighting.

### Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age, and whether they reported voting in the last general election. The expected population turnout has been included as a population total in the weighting matrix.

	Unweighted percentage	Weighted percentage
Estimated <b>Voting Age Population</b> turnout	70%	60%

The Likelihood to Vote model was developed using data from a subset of the Public Voice panel that was recruited just before the 2019GE (providing their stated likelihood to vote in that election) and surveyed about it shortly afterwards (confirming whether or not they voted).

### Further details

Please contact Richard Crawshaw [Richard.Crawshaw@VerianGroup.com](mailto:Richard.Crawshaw@VerianGroup.com) for further details on the methodology used in this polling.
