

Eight in ten Brits in favour of local lockdowns to tackle coronavirus

15 July 2020, London -

Findings from Kantar's research, which took place between 9 and 13 July, reveal:

- 81% of people in the UK approve or strongly approve of the government using local lockdowns to tackle outbreaks of coronavirus, and 71% think that they will be fairly/very effective.
- 82% of people are very/fairly concerned that there will be a second wave of coronavirus infections in the UK.
- Almost half (47%) think that the pace at which the government is adjusting restrictions to everyday life is much/a bit too fast, compared to 19% who think it is a bit/much too slow. One in four think the government have got it about right (26%).
- 47% think that the government are placing too much emphasis on protecting the country's economy and not enough on protecting people's health, compared to 15% who think the emphasis is too much on health over economy. 25% think they have got the balance about right.
- One in four of the public who state their income has been reduced by coronavirus expect the reduction to be permanent (25%, +5 vs June 2020).
- Public confidence in the economy remains gloomy, with three quarters of people (74%, -2) stating that they think Britain's economy is doing worse than 12 months ago.
- As new rules on the mandatory wearing of face masks as of 24 July in England are announced, more people are purporting to wearing a mask outside their home in the last week, compared to June: 14% (+5) 'always', 17% (+8) 'usually', 21% (+8) 'sometimes'. Fewer people said they 'never' wore a mask in the last week; 25% compared to 41% in June.

Economic impacts and expectations

Overall, expectations for the economy and the personal impacts remain gloomy, with minor upticks from June:

- Job insecurity remains high, with 37% (-2) of those working believing their job is less safe than it was 12 months ago. 45% (-1) of those working state their job to be much the same as 12 months ago.
- Looking to the future, two thirds (65%) of those working think that their job is very/somewhat secure in the period to the end of 2020, with 27% saying not at all/not very secure.

- Just under three quarters of people think that the British economy is doing worse than 12 months ago (74%, -2),
- Around a third (34%, -2) report that coronavirus has reduced their personal income. Of that group, 25% expect this reduction to be permanent (+5). 26% (-8) think it will return to normal within a few weeks or months and 36% (-2) think their income will return to normal, but it will take more than a few months. 13% don't know (+5).
- Three in ten state that they are finding it harder to meet their monthly household budget compared to 12 months ago (30%, +2).

However, despite the economic worries being reported, this study also shows some early signs that the public may be anticipating a quick recovery for the economy. There has been a continuing shrinking in the proportion that think the economy will be doing worse in 12 months' time: 41%, compared to 43% in June, 48% in May and 50% in April.

Perceptions of actions and intervention to tackle COVID-19

As British society experiences changing lockdown restrictions, new challenges are emerging for longer-term initiatives for tackling COVID-19:

- Public perception of how the UK government is handling the crisis remains poor, with over half of people (53%, -2) stating that they think the government is handling the coronavirus outbreak very/fairly poorly.
- Fewer than four in ten (39%, no change) think that the government are handling it very/fairly well.
- Half (50%, +1) of the public now rate the government's communication of information about COVID-19 as very/fairly good.
- Four in ten (41%) say they 'definitely' plan to get vaccinated if a coronavirus is developed, compared to 28% who say 'probably'.
- The proportion of people who say they would be very/fairly likely to use the planned NHS contact-tracing app remains under half (47%, +1). Women are more likely than men to say they would be likely to use an app (50% compared to 44% of men).

Voting intentions

- Conservative 45% (+2 vs June 2020)
- Labour 35% (nc)
- Liberal Democrats 9% (+1)
- SNP 5% (nc)
- Green 2% (-2)
- The Brexit Party 2% (nc)
- UKIP 1% (nc)
- Plaid Cymru 1% (+1)
- Other 1% (+1)

Notes to Editors

Additional findings and methodology:

When asked if the UK should consider re-joining the EU if the general economic situation turned out to be a lot worse after Brexit, 33% said 'yes', 34% said 'no' and 16% said 'maybe'.

If a new referendum was held on EU membership, 39% say they would vote to stay out of the EU, 33% say they would apply to join the EU. 16% would not vote and 12% say they don't know.

Over four in ten Britons think that leaving the EU will make it neither easier or more difficult for the UK government to handle outbreaks like coronavirus in the future (44%, +5).

-Ends-

Methodological information

[The survey data and further details on the methodological approach can be found here.](#)

A total of 1,131 interviews were conducted online among adults living in Great Britain between 9th and 13th July 2020. Interviews were conducted using the Kantar Research Express Online Omnibus, which uses the Kantar online access panel as its sample source.

The data was weighted to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Any use of this research must cite Kantar as the source.

Polling Methodological Note – July 2020

A representative sample of 1,131 adults in Great Britain were interviewed between the 9th and 13th July 2020. All interviews were conducted as online self-completion. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page three.

Change since our last poll

We are no longer including working status in the weighting matrix. This is because the latest benchmark population statistics available from ONS pre-date the coronavirus lockdown and are unlikely to accurately reflect the current population profile. This change has not affected our headline voting intentions for the Conservative party or the Labour party.

Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age and whether reported voting in the 2017 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2017 General Election.

Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017¹). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 42.1% to 47.6%
- Labour Party = 33.4% to 38.3%
- Conservative lead over Labour = 3.9%pts to 14.9%pts

¹ See: https://www.europeansurveyresearch.org/news/non-prob/INPS_06_Kuha.pdf and <https://rss.onlinelibrary.wiley.com/doi/full/10.1111/rssa.12329>

Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

Gender* and age

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
Male 18-24	64	63
Male 25-34	99	98
Male 35-44	92	90
Male 45-54	100	98
Male 55-69	139	120
Male 70+	58	85
Female 18-24	65	60
Female 25-34	100	97
Female 35-44	91	91
Female 45-54	106	100
Female 55-69	155	125
Female 70+	62	105

*Those reporting an "other" gender are randomly allocated to male or female.

Region

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
North East England	50	47

Scotland - SNP	3%	2%
Scotland - Other	1%	1%
Scotland - No vote	1%	3%
Wales - Labour	2%	1%
Wales - Conservative	1%	1%
Wales - PC	<0.5%	<0.5%
Wales - Other	<0.5%	<0.5%
Wales - No vote	1%	2%

*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated Voting Age Population turnout if General Election were to be held tomorrow	82%	61%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2017 general election and immediately after the election.

Further details

Please contact Luke Taylor luke.taylor@kantar.com for further details on the methodology used in this polling.
