

Two-thirds in Britain think we should keep some restrictions after July 19

15 July 2021, London – Our research into British public opinion and voting intentions finds that there is an increasing proportion in Britain who think the COVID restrictions are being adjusted too fast and a majority who want the wearing of face masks to continue in shops and on public transport. Our research into British public opinion and voting intentions finds that there is an increasing proportion in Britain who think the COVID restrictions are being adjusted too fast and a majority who want the wearing of face masks to continue in shops and on public transport.

Other key findings from our research which took place between 7th and 12th July reveal:

- Two thirds of people (66%) think we should keep at least some (some/most/all¹) of the existing restrictions after July 19th.
- About three in ten (29%) think “we need to learn to live with COVID-19 without any restrictions”.
- A growing proportion think that the pace at which the government is adjusting restrictions to everyday life is much/a bit too fast: 41% compared to [29% in June](#).
- Six in ten (60%) think everyone should continue to wear face masks in shops and on public transport for a further period of time.
- 49% of people (+2) say they think the government have handled the pandemic very/fairly well. 45% say very/fairly poorly (no change).
- 39% (+4) think the government are placing too much emphasis on protecting the country’s economy and not enough on protecting people’s health, compared to 18% (+2) who think there is too much emphasis on health. 27% think they have got the balance about right (-6).
- 39% rate the cooperation between countries to distribute COVID-19 vaccines as very/fairly good, compared to 45% who say fairly/ very poor.

Household economic impacts

This month’s research finds that 37% (-1) of Britons think the economy will be doing better in 12 months’ time. Other findings include:

- 21% of those in work say their job feels safer than it was 12 months ago (+4). This is the highest figure recorded since the pandemic began.
- Of those working, 21% say their job feels less safe that 12 months ago (-6) which is the lowest figure since September 2019. 46% say much the same (-4).
- 6 in 10 (60%, -1) now say that their personal income “has not been impacted” by coronavirus, compared to 56% in March, 54% in February and 49% in January

KANTAR PUBLIC

- 28% (-1) say it is harder for them to meet their monthly household budget than it was 12 months ago
- When asked about the impact of the pandemic on personal savings, there is a mixed picture in Britain: One in four (24%, -1) say their savings have decreased since the start of the pandemic, 41% (+4) say they have stayed the same, and 20% (-1) say their savings have increased.
- Of the people who saved extra money, only 11% (+8) of them intend to spend it all by the end of the year. 63% (+3) who have saved extra money say that they will only spend “some of it” or “none at all” this year.

Attitudes towards COVID-19 restrictions and actions to tackle the pandemic

- 41% of people think the pace at which the government is adjusting the restrictions to everyday life is much/a bit too fast (+12) compared to one in three (33%, -9 vs June) who think it is ‘about right’.
- 35% think people should be able to decide for themselves whether to wear masks in shops and on public transport (vs 60% who think everyone should wear in shops and public transport for further period).
- 62% (-3) of people strongly/tend to support the introduction of a vaccine passport to allow overseas travels into and out of the UK this summer, whilst 23% (no change) oppose the idea.

When asked about the COVID-19 vaccines:

- Three quarters of people (76%, -3) say they are very/somewhat satisfied with the vaccine rollout organised by government and health authorities.
- 51% (+2) think that vaccines should be compulsory for all adults, compared to 39% who think adults should be allowed to choose (-3).

Life post-pandemic

When asked to think about what should happen after the end of the coronavirus pandemic:

- 39% (-2) of people think that actions to address climate change should be of a priority for governments than before, whilst 43% (+6) think it should be same as before, and 9% (-4) think less of a priority.

When asked to rank 11 possible measures to improve public life in the UK in order of importance:

- 29% (+4) of people put “tackling climate change and protecting the environment” as one of their top three issues whilst 33% (-3) of people placed it as one of their bottom three issues.

KANTAR PUBLIC

Voting intentions

- Con 44% (-1 vs June 2021)
- Lab 31% (-1)• L Dem 12% (+4)
- SNP 6% (+2)• Green 4% (-2)
- Reform UK (formerly Brexit Party) 1% (-1)
- Plaid Cymru 1% (nc)
- UKIP <1% (-1)
- Other 1% (nc)

-Ends-

Methodological information

The survey data and further details on the methodological approach can be found here. A total of 1,057 interviews were conducted online among adults living in Great Britain between the 7th and 12th July 2021. All interviews were conducted online using the Kantar Research Express. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Any use of this research must cite Kantar as the source.

About Kantar Public:

Kantar Public is part of Kantar, the world's leading insights and consulting company. We combine expertise in human understanding with advanced technologies to provide the evidence and advisory services for successful decision-making in government and the public sector. By delivering global best practice through local expertise, we help our clients build a better public realm. For more information, please visit www.kantarpublic.com

Polling Methodological Note – July 2021

A representative sample of 1,057 adults in Great Britain were interviewed between the 7th and 12th July 2021. All interviews were conducted online using the Kantar Research Express. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page two.

Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting and whether reported voting in the 2019 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2019 General Election.

Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017¹). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 40.5% to 47.3%
- Labour Party = 27.6% to 34.5%
- Conservative lead over Labour = 6.9%pts to 18.6%pts

¹ See: https://www.europeansurveyresearch.org/news/non-prob/INPS_06_Kuha.pdf and <https://rss.onlinelibrary.wiley.com/doi/full/10.1111/rssa.12329>

Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

Gender* and age

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
Male 18-24	60	59
Male 25-34	66	91
Male 35-44	73	84
Male 45-54	95	91
Male 55-69	130	112
Male 70+	63	79
Female 18-24	60	56
Female 25-34	89	90
Female 35-44	95	85
Female 45-54	105	94
Female 55-69	164	117
Female 70+	57	98

*Those reporting an "other" gender are randomly allocated to male or female.

Region

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
North East England	46	44
North West England	142	119
Yorkshire & Humber	101	90
East Midlands	73	79
West Midlands	96	96
East of England	110	101
London	137	143
South East England	165	149
South West England	78	93
Wales	41	52
Scotland	68	91

Education by age

Source: Annual Population Survey (Jul 2018-Jun 2019)

	Unweighted count	Weighted count
Aged 18-24 with a degree	36	21
Aged 25-44 with a degree	165	148
Aged 45-69 with a degree	174	112
Other	682	777

Vote in the 2016 EU referendum*

Source: EU referendum & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
Remain	38%	31%
Leave	42%	33%
Did not vote	19%	36%

*An imputed response is given for those that prefer not to say who they voted for in the referendum.

Vote in the 2019 General Election*

Source: General Election & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
England - Labour	23%	18%
England - Conservative	35%	25%
England - Lib Dem	7%	7%
England - Other	9%	3%
England - No vote	15%	34%
Scotland - Labour	1%	1%
Scotland - Conservative	1%	1%
Scotland - SNP	3%	2%
Scotland - Other	1%	1%
Scotland - No vote	1%	3%
Wales - Labour	1%	1%
Wales - Conservative	1%	1%
Wales - PC	1%	<0.5%
Wales - Other	1%	<0.5%
Wales - No vote	1%	3%

*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated Voting Age Population turnout if General Election were to be held tomorrow	82%	60%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2019 general election and immediately after the election.

Further details

Please contact Luke Taylor luke.taylor@kantar.com for further details on the methodology used in this polling.
