

# Public concern for economy remains at highest level since 2011

**13 May 2020, London** - Our monthly barometer on British public opinion and voting intentions, which reveals worsening public perceptions of the government's handling of the coronavirus outbreak, continued pessimism over the health of Britain's economy now and in the future and a public increasingly likely to use a contact-tracing app.

Findings from Kantar's research which took place between 7 and 11 of May reveal:

- Public confidence in the economy has dropped even further, to the lowest level since measurement began in August 2011, with almost seven in ten (69%) stating that Britain's economy is doing worse than 12 months ago, compared to 65% in April
- Four in ten (38%) report that coronavirus has reduced their personal income
- Public perception of how the UK government is handling the crisis is worsening, with four in ten people (43%) stating that they think the government is handling the coronavirus outbreak very or fairly poorly, compared to [30% in April](#). Half of people (49%) think that the government are handling it very or fairly well, compared to 61% of people in April who said the same
- The public are also more likely to say they would be very / fairly likely to use the planned NHS contact-tracing app (59% in May, compared to 53% in April)

## Economic impacts and expectations

Overall, personal experience and expectations for the economy remain in line with April with numbers feeling insecure about their job remaining at or close to record-high:

- Job insecurity remains high; four in ten (40%) believe their job is less safe than it was 12 months ago. This is the second highest recorded figure since our measurement began in August 2011 (and compares to 44% in April)
- 38% report that coronavirus has reduced their personal income. Only 8% of these individuals expect their income to return to normal immediately once lockdown is over. 29% think it will return to normal within a few months, 41% think their income will return to normal but it will take more than a few months, and 15% expect their personal income to be permanently reduced
- The public continue to expect coronavirus to have a long-term impact, with almost half of people (48%) stating that they think the economy will be worse in 12 months, compared to 50% of people last month
- Three in ten (29%, -4 vs April 2020) agree that their household is likely to require financial support from the government within the next three months
- Three in ten (30%, -2 vs April) said they are finding it harder to meet their monthly household budget than they were 12 months ago

## Perceptions of actions and intervention

- Three in ten say they would be fairly / very unlikely to use the planned NHS contact tracing app – 28% in May compared to 32% April
- Among those that say they are unlikely to download the contact tracing app, the main reasons are: concerns about privacy (46%), not wanting the government to track their location (27%) and not thinking the app will help to slow the spread of coronavirus (26%)
- Expectations of government intervention in the economy remain high, with more than three quarters of people agreeing (77% agree or strongly agree) that “it’s important the government helps people and businesses affected by coronavirus, whatever the cost”. However, this is 7 percentage points lower than in April

## Voting intentions

- Conservative 51% (-3 vs April 2020)
- Labour 32% (+4)
- Liberal Democrats 7% (-2)
- SNP 5% (+1)
- Green 2% (-2)
- The Brexit Party 2% (+1)
- Plaid Cymru 1% (nc)
- UKIP <1% (nc)
- Other 1% (+1)

Commenting on the findings, UK CEO of Kantar’s Public division, Craig Watkins said: “The impact of coronavirus continues to worry British households – seen in our research through high levels of concern for the national economy and public worries about their job security. We continue to see high levels of support for government intervention to control the outbreak and deal with its impacts, with an increasing number of people saying they would be likely to use a contact tracing app, and strong agreement that the government should help people and businesses, no matter the cost.”

Understanding the levels of support and the impacts continues to be crucial for government policy to be able to respond effectively. [Kantar’s Social Response and Recovery programmes](#) support policymakers to respond to these complex challenges and develop policy for a resilient recovery. In the UK for example, Inside Lives, our longitudinal qualitative study, provides insight into public experience, feelings and beliefs during this time using video diaries and discussions.

## Notes to Editors

### Additional findings and methodology:

19% (+2) of Britons think that leaving the European Union will make it easier for the UK government to handle outbreaks like coronavirus in the future. 23% (-4) think it will be more difficult. Majority of Britons don’t think that the UK leaving the EU will make it easier or more difficult for the UK government to handle outbreaks like coronavirus in the future (40%, -1).

## Public view on negotiations with the European Union

Three in ten Britons (31%, -2) think that the UK government is handling the negotiations regarding the UK and EU's future 'well'; 38% (+4) of people think they are being handled 'poorly'.

If a new referendum was held on the UK's membership of the European Union, 40% (+3) of Britons say they would vote to Remain, 32% (-4) say they would vote to Leave. 17% (-1) say they wouldn't vote and 10% (+1) 'don't know'.

-Ends-

## Methodological information

[The survey data and further details on the methodological approach can be found here.](#)

A total of 1,130 interviews were conducted online among adults living in Great Britain between 7 and 11 May 2020. Interviews were conducted using the Kantar Research Express Online Omnibus, which uses the Kantar online access panel as its sample source.

The data was weighted to match population totals for age, gender, working status, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election.

Any use of this research must cite Kantar as the source.

## Polling Methodological Note – May 2020

A representative sample of 1,130 adults in Great Britain were interviewed between the 7<sup>th</sup> and 11<sup>th</sup> May 2020. All interviews were conducted as online self-completion. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, working status, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page two.

### Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age and whether reported voting in the 2017 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2017 General Election.

### Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

### Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017<sup>1</sup>). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 48.0% to 53.8%
- Labour Party = 29.3% to 34.2%
- Conservative lead over Labour = 14.4%pts to 24.1%pts

## Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

### Gender\* and working status

Source: Annual Population Survey (Jul 2018-Jun 2019)

	<b>Unweighted count</b>	<b>Weighted count</b>
Male working	372	371
Male not working	177	181
Female working	337	331
Female not working	244	247

\*Those reporting an "other" gender are randomly allocated to male or female.

### Gender\* and age

Source: ONS Mid Year-2018 Population Estimates:

	<b>Unweighted count</b>	<b>Weighted count</b>
Male 18-24	67	63
Male 25-34	94	97
Male 35-44	91	89
Male 45-54	101	98
Male 55-69	137	120
Male 70+	59	84
Female 18-24	66	60
Female 25-34	97	96
Female 35-44	94	91
Female 45-54	104	100
Female 55-69	163	125
Female 70+	57	105

\*Those reporting an "other" gender are randomly allocated to male or female.

## Region

Source: ONS Mid Year-2018 Population Estimates:

	<b>Unweighted count</b>	<b>Weighted count</b>
North East England	38	47
North West England	115	127
Yorkshire & Humber	109	96
East Midlands	96	84
West Midlands	111	102
East of England	122	108
London	120	153
South East England	135	159
South West England	112	100
Wales	58	56
Scotland	114	98

## Education by age

Source: Annual Population Survey (Jul 2018-Jun 2019)

	<b>Unweighted count</b>	<b>Weighted count</b>
Aged 18-24 with a degree	38	23
Aged 25-44 with a degree	187	158
Aged 45-69 with a degree	143	119
Other	762	830

## Vote in the 2016 EU referendum\*

Source: EU referendum & ONS Mid Year-2018 Population Estimates

	<b>Unweighted percentage</b>	<b>Weighted percentage</b>
Remain	41%	31%
Leave	41%	33%
Did not vote	19%	36%

\*An imputed response is given for those that prefer not to say who they voted for in the referendum.

## Vote in the 2019 General Election\*

Source: General Election & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
England - Labour	23%	18%
England - Conservative	34%	25%
England - Lib Dem	8%	7%
England - Other	6%	3%
England - No vote	14%	34%
Scotland - Labour	1%	1%
Scotland - Conservative	2%	1%
Scotland - SNP	4%	2%
Scotland - Other	1%	1%
Scotland - No vote	2%	3%
Wales - Labour	2%	1%
Wales - Conservative	2%	1%
Wales - PC	<0.5%	<0.5%
Wales - Other	<0.5%	<0.5%
Wales - No vote	1%	2%

\*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

## Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated <b>Voting Age Population</b> turnout if General Election were to be held tomorrow	84%	62%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2017 general election and immediately after the election.

## Further details

Please contact Luke Taylor [luke.taylor@kantar.com](mailto:luke.taylor@kantar.com) for further details on the methodology used in this polling.
